

Innova combine new technology and product development with sale of acknowledged products. We have a multidisciplinary team of engineers who work with customer adapted solutions, design services and development of our own products within ROV and subsea technology. Working in a challenging and expanding market, we see the need to strengthen our organization with smart and ambitious people. We are looking for engineers and project managers to join us in developing the company further...

This time we are looking for a:

Engineer – mechanics and mechatronics

Our engineering team is involved in design, development, and production of our own products and bespoke solutions for our customers, as well as engineering and consultancy services within our areas of expertise. In order to develop the company further, we are looking for the right people with competence in mechatronics, mechanical design and analysis, and hydraulics. As an engineer at Innova you will participate in all areas of our engineering and development projects. You can be part of, or leader of a development team. You will also have the possibility to be responsible for your own products or specialized fields.

Job responsibilities:

- Design, analysis and documentation of mechanical systems, control systems, custom design solutions, subsea tooling and products within the Innova product line.
- Follow up production and assembly – follow the product development process from idea to market.
- Contribute to multidisciplinary project teams
- Be part of, and manage projects
- Product responsibility
- Take an active part in developing the company within your areas of expertise

YOU:

- ...are not afraid of a challenge, and like to try out new things
- ...like to find solutions, and to take an active part in creative processes
- ...hold an engineering degree (BSc, MSc) in areas such as product development, mechatronics, mechanical construction or marine engineering
- ...have experience with 3D-modelling and analysis
- ...preferably have some years' experience in the ROV or subsea business
- ...have excellent communication skills, and are fluent in English and preferably Norwegian
- ...work well in a team!

Innova offer:

Innova focus on being the best possible employer. We believe that the key element for success is to provide a work environment which provides opportunities, interesting challenges and allow you to develop professionally and creatively. We work hard to maintain good collegial relationships and a friendly work environment. We offer competitive wages, pension- and insurance plans.

For any questions regarding the job, please contact Knut Nilsen (+47) 51 96 17 05.
